

Security Information – Instructions

Each user must select three security questions and provide unique answers to those questions.

Listed below are the requirements for answers to your security questions:

- Answer must be between 3 and 40 characters.
- Allowable characters are letters, numbers, spaces, and the following special characters (# & - : ' , . /).

If you wish to change your security questions after registration, this function is available under the User/Access section of your Portal account.
